

Vantiq Expands Its Footprint to the APAC Region

11 November 2020, Singapore - After a successful partner ecosystem being built in the Americas, we are thrilled to announce that Vantiq is now expanding in the APAC region, and we are looking to recruit suitable partners in Singapore, Malaysia, Indonesia, Thailand, Philippines, Vietnam, South Korea, Australia and India to join us in our innovation journey.

Headquartered in Walnut Creek, California, USA, Vantiq is a new application development platform that enables customers to rapidly build innovative solutions to drive real-time business. These applications combine data-streams from sensors, mobile devices, existing enterprise systems and people with rules and artificial intelligence (AI) for real-time awareness. Built on a modern Reactive architecture, Vantiq is massively scalable and can be dynamically distributed in any environment. Low Code tools and abstractions hide the underlying infrastructure so complex applications can be created in days with minimal coding and easily adapted on-the-fly.

Comprehensive Training Curriculum and Programme

Globally, Vantiq now has over 100 partners in our ecosystem. Our [Partnership Programme](#) is divided into four main categories - System Integrators, Independent Software Vendors, Global Strategic Partners and Value Added Resellers / Solution Providers. Prominent Partners include Softbank, Infosys, T Systems, DXC Technology, EISOT and many more.

Vantiq offers comprehensive Sales & Technical Training programs to quickly ramp up your competency & ensure project success. This will help partners gain an insight into the types of solutions that can be built with Vantiq's platform, as well as a basic understanding of the Vantiq development paradigm, platform, and development resources to start developing event-driven real-time applications. Vantiq also offers advanced technical training for the more experienced developers for a hands-on deep dive into using our platform to develop real-time solutions and enterprise connectors.

Advantages of becoming a Vantiq partner

Vantiq is the only low code, no code platform for rapid innovation of real-time event-driven enterprise applications. With Vantiq, partners are able to innovate faster and operate smarter addressing real-world requirements of real-time businesses.

Digital businesses need to be first to market with new products and services. Vantiq can help bring projects from concept to production in mere weeks. Gaining situational awareness is now paramount for digitalisation and business transformation. With Vantiq's low-code and agile nature, product and application development is now easily scalable.

About Vantiq

Vantiq enables customers to build next-generation applications that combine real-world data and real-time events. Their agile development environment allows complex applications to be created in weeks with minimal coding, taking full advantage of artificial intelligence (AI), Internet of Things (IoT) and edge computing. Vantiq powers a broad array of applications for smart cities, smart buildings, oil and gas, telecom, healthcare and other industries. Vantiq was founded in 2015 by technology veterans Marty Sprinzen and Paul Butterworth, co-founders of Forte Software.
